Premium Indian Jaggery | 100% Natural & Chemical-Free
An MCA Registered Company

ABOUT MAGAR AGRO EXPORTS LLP

Deeply anchored in a multi-generational agricultural heritage, we deliver the authentic excellence of Indian agrarian produce to the global marketplace. Distinguished from conventional exporters who function as third-party intermediaries, our core competitive advantage lies in our direct vertical integration. By exercising direct oversight—from the primary farm-gate level to our advanced processing facilities—we ensure absolute operational transparency and full product traceability.

Infrastructure & Process

- **Precision Sourcing:** We harvest exclusively high-grade, naturally matured sugarcane directly from our integrated agricultural network.
- **Non-Synthetic Processing:** Our produce is processed without synthetic additives or prohibited colorants, meticulously preserving natural freshness and pure taste.
- **Standardized Grading:** Every batch undergoes strictly monitored, in-house quality checks to ensure rigorous batch-level consistency in texture and natural color.
- **End-to-End Traceability:** We offer our global partners absolute transparency from the primary farm-gate to final export packaging.

OUR PREMIUM PRODUCTS

1. **Jaggery Blocks (Solid Traditional Format)** Authentic large-format blocks traditionally extracted from our primary farm-gate sugarcane cultivation. Processed with a singular focus on non-synthetic methodologies to retain core agricultural integrity.

2. **Jaggery Cubes (Convenient Modular Format)** Precision-cut, uniform pieces designed for modern culinary efficiency. A nutrient-dense natural sweetener, ideal for contemporary households and specialty beverages.

3. **Jaggery Powder (Granulated Fine Format)** A smooth, granulated alternative to refined sucrose. Systematically processed to preserve naturally occurring micro-nutrients and essential minerals.

PRODUCT SPECIFICATIONS:

- **Shelf-Life:** Up to 12 Months (Under recommended storage).
- **Moisture Control:** Strictly maintained within standard export limits.
- **Synthetic Additives:** 0% (Strictly Non-Synthetic & Chemical-Free).
